No. $\frac{281}{256.}$ Enc. 4.

SHIMOGA DY. COMMR'S. OFFICE,
*Dated 2nd August* 1889.

*From*

*The Deputy Commr., Shimoga District.*

*To*

*The Chief Secretary to the Govt. of Mysore.*

SIR,

With reference to the Proceedings of the Dewan No. 3683-92—Cir. 98, dated 17th September 1887, calling for a report on the working of the rules for the grant of lands on favorable terms for garden cultivation, I have the honor to report as follows :—

2. The system has been attended with satisfactory results only in the Malnad portions of this District, and even there, it is only in Tirthahalli Taluk that applications have come in in large numbers.

3. From September 1887 the date of the Proceedings of the Dewan up to end of June 1889, the number of applications for unassessed waste was 145. Of these 34 were granted. The appended Statement C will give much interesting information regarding the localities for which applications have been made, and the rates borne by the lands granted for cultivation.

4. Out of a total number of 145 applications made, 124 or 84·9 per cent were from Tirthahalli Taluk, 7·5 per cent from Nagar and 6·1 per cent from Sagar. Of the 124 applications from Tirthahalli, 31 were granted, 31 were rejected as being for areas below the minimum and 6 on account of disputes, and 18 were withdrawn. The number pending is 38. The figures for the other taluks are given below :—

| Taluk. | Applications made. | Granted. | Withdrawn. | Rejected. | | Pending. |
|---|---|---|---|---|---|---|
| | | | | Being below minimum. | For other reasons. | |
| Shimoga ... | 1 | ... | ... | .. | ... | 1 |
| Sagar ... | 9 | 2 | 1 | ... | 1 | 5 |
| Nagar ... | 11 | 1 | 2 | ... | 1 | 7 |

5. In all cases the applications were sent to the Superintendent of Survey for the rates being fixed with a view that each piece of land may be assessed at the rate proper for it. Fixing the assessment on the average rates for the village may not give satisfactory results either as regards the raiyat or the Government.

6. In connection with the working of the new scheme, the large number of applications from Tirthahalli would naturally call for some explanation especially when considered with the comparative backwardness of the raiyats of Nagar and Sagar. The low rates borne by the land applied for ranging as they do from Rs. 8 to Rs. 12 with the exception of 8 cases, will first arrest attention. If proof was wanted that moderation in rates means prosperity for the raiyat, and ultimate increase of revenue to Government, the result of the working of the Alve scheme in Tirthahalli will afford it. It is well known that Tirthahalli produces supari of better quality and in greater abundance than Sagar and even Nagar. Tirthahalli commands more labor than either of the above named taluks, and there is the excellent road from Shimoga to Agumbi passing right through the taluk. Although there was considerable enhancement in this taluk also, the rates were on the whole moderate, the average being Rs. 13—11—5 without local funds, the maxima being 20 Rs., 18 and 16. In Sagar, on the other hand the maximum was 25 and even exceeded this limit in many cases, and the average was as high as Rs. 18—4—10. There is nothing strange in this glaring disparity as these maxima depend very much upon the accident of how much the former Governments were able to extort from the raiyats in unsettled times in different taluks. I understand that in Tirthahalli the raiyats taught by the experiences of their bretheren in Sagar, did not allow much waste or dry or wet land to be measured into their gardens. In Sagar the vicious practice of including every patch of adjoining land whether waste, cultivated or even culturable, aggravated the burden of the raiyats, and much waste land and varieties of cultivation were included in the same number by the Survey Department also, and the raiyats have not yet succeeded in getting relief. Further the figures clearly support the popular belief that the Survey Department felt that they had dealt rather severely with Sagar, and moderated their rates as they advanced southwards. Added to these, there is the great labor difficulty in Sagar about which I shall have more to say in my memorandum on Kumri cultivation. It is also noticeable that the population in the Malnad is steadily going down.

7. Turning now to the question of grant on Alve of assessed waste lands lying unoccupied for more than three years, under para 7 of the Dewan's Proceedings, practically the only taluk that has gone in for this class of Alve is Sagar. There were altogether 35 applications, of which 11 were granted all on 6 years' Alve. Details for the other taluks are given below :—

| Taluk. | Applications made. | Granted. | Rejected. | With drawn. | Pending. |
|---|---|---|---|---|---|
| Channagiri ... | 1 | 1 | ... | ... | ... |
| Sorab ... | 12 | 6 | ... | ... | 6 |
| Nagar ... | 1 | ... | ... | ... | 1 |
| Tirthahalli ... | 8 | 1 | 6 | 1 | ... |

8. In connection with applications for unoccupied assessed gardens, it is noticeable that even before the passing of the Proceedings in question it was from Sagar Taluk that the greatest number of applications for Alve were received, and specially granted by Government under Dewan's Proceedings No. 4627—213, dated 29th November 1883. Gardens would appear to have been abandoned on a large scale in this taluk owing probably to the sudden change in the assessment resulting mostly in enhancement which must have greatly unsettled the supari growers. The labor difficulty is increasing every day and with it the cost of cultivation. Considering the labor and money spent on these gardens, and the fact that it is only in the last extremity that a raiyat will give up his garden, it can readily be imagined how heavily the assessment and the labor difficulty must have pressed to force him to abandon his garden. Again, for every garden abandoned, there may be many the profits from which just suffice to meet the Government kandayam, and leave no margin to the raiyat. I am persuaded that if the Alve concessions had not been made the gardens, especially in the western Maganis, would have gradually gone out of cultivation and there would have been even a greater fall in the revenue than was noticeable in the years immediately following the survey settlement when the assessment was forced up by enhancement of rates, but gradually went down in succeeding years in spite of favorable prices and facilities for transport afforded by the country being opened up on all sides

9. It takes much time and costs much money and labor to revive a neglected and

abandoned garden, and this the raiyats take up generally more from habit and because they are accustomed to such cultivation than from any prospect of profit. They work at it for a few years and when the assessment begins to pinch again they abandon it. The present rules make liberal provision for abandoned gardens, but it is a question if, in the case of *bonâ fide* resignations or resumptions due to heaviness of assessment, it will not be affording more substantial and lasting relief if there is a permanent reduction made in the assessment itself. Indeed this was the kind of relief asked for by the raiyats round about Kodachadri, although the people of the Sagar Western Malnad were more for Mahrattis being encouraged to settle in the country by Kumri being allowed. I shall have occasion in my Memorandum on Kumri cultivation to say how the present rates added to other causes have led to whole areas near the Ghats being abandoned, and to the people moving out either to the other parts of the Malnad or to the adjoining Maganis of South Kanara, and how if timely consideration is not shown, all traces of supari cultivation in these parts will have soon disappeared.

10. With reference to the Proceedings of the Dewan, Camp No. 279—87, dated 10th April 1888, reducing the minimum of area of lands to be granted on Alve to 1 acre in the Malnad, and calling for further report as to its further reduction, I may be allowed to remark that I do not quite see on what grounds the Superintendent of Survey and Settlement objects to the minimum being brought down to 10 guntas.

11. From the statement given below it will be seen that out of the whole of the garden lands in the Malnad measuring one acre and below made into separate survey numbers, 2,573 numbers or 37·65 per cent are below 10 guntas in extent, and of these as many as 541 are below 4 guntas. The sites now applied for are, in the majority of cases, situated at the head of the large "stretches of garden" referred to, and will tend to these stretches being further extended. The raiyats, as far as I can judge, have never thought of getting the 4 annas excused. They are perfectly willing to pay it. The reasons for such small patches as 10 guntas and below being applied for will be found in the great trouble and cost of bringing up a plantation of arecanuts, and I think certainly the raiyats who, in many cases, have to devote their personal labor and that of their family to rearing the areca should not be forced to go in for larger areas than their means would allow. I have reason

raiyats can get their cooly from it, and for such people it is not fair to insist on their going in for more than they can conveniently work.

13. I shall not take up time by explaining how the high rates adopted by the former Governments were justified and were made endurable by the Government bearing at least a part of the cost of planting a garden, by their imposing no assessment for 12 and 16 years until the garden came into full bearing, by fixing the assessment itself with reference to the productive powers of each garden judged by Government Officials and Gaudas well versed in such matters, and by liberal concessions when there was loss from "Kole" and other causes, and by the system of "Huttalu" or predial slavery, and above all by the gardens being in the neighbourhood of the seats of flourishing and powerful kingdoms which enabled the owners to realize a considerable profit from the sale of such small articles as betel-leaf and plantains alone. All these have no place in the Revenue Survey system but the average rates are heavier than under the former regime.

14. I do not apprehend any difficulty or danger by lowering the minimum to 10 guntas. I would go even lower, and fix it at 5 guntas. Government will have, however, soon to solve the question of "Soppu" required for all these gardens. There is no difficulty just now, as there is no division of jungles into "Soppinbetta," "Kan" and "Mufat," and raiyats take "Soppu" wherever it can be had and make it difficult to enforce the Forest Rules in their case, especially in Tirthahalli Taluk. This subject has already been brought to the notice of Government. It will be seen that as many as 31 applications have been received in Tirthahalli for areas below the minimum and rejected.

15. I append to this report a statement of the supari revenue and population in Sagar, Nagar, Tirthahalli, Sorab and for such Maganis of the late Anantapur Taluk as have now been joined to Nagar and Sagar Taluks.

16. The Statements A and B are herewith submitted.

## A.

Statement showing the particulars of Lands for which Kauls have been granted under the terms of Notification No. 121, dated 17th September 1887, in the Shimoga District during the year 1888—89 and also during April, May and June of 1889—90.

| No. | Taluk. | Unassessed Government Waste Land granted under Rule 1. | | | | | | | | | | | | Remarks. |

# GOVERNMENT OF MYSORE

## REVENUE DEPARTMENT.

**REVENUE.**

To

THE SURVEY AND SETTLEMENT COMMR. IN MYSORE.
" DEPUTY COMMISSIONERS OF DISTRICTS.
" DEPUTY ACCOUNTANT GENERAL.

*Dated* 18*th March.*

*Despatched*

*Received*

No. 6749-59.
R. 1183.

Recording correspondence regarding the introduction of Survey rates of assessment in the Koppa Taluk.

Mysore Govt. Press, Bangalore.—15-4-80.—80.

*Proceedings of the Chief Commissioner of Mysore in the Revenue Department, (Revenue),—dated 18th March 1880.*

From the Survey and Settlement Commissioner of Mysore, To the Secretary to the Chief Commissioner of Mysore, No. 303, dated Bombay, 3rd April 1879.

I have the honor to forward a letter from the Superintendent, Revenue Survey, No. 194 of the 27th February and appended correspondence with the Commissioner and Deputy Commissioner proposing rates of assessment for the Koppa Taluk of the Kadur District of the Nagar Division.

2 This taluk is fully described in the Superintendent's report; on this point therefore any remarks from me would be superfluous.

3. It is purely a "Malnad" taluk of the most decided description as much or perhaps more so than any other taluk in Mysore. Supari cultivation with its concomitant spices, betel-leaf and plantains and rice are the staples of the taluk. The dry crop cultivation is confined to a little ragi and some small quantity of oil-seeds for home consumption. Sugar-cane is grown, but the quality is inferior. The supari has a high reputation for excellence.

4. The past revenue management has been of the most primitive description. What is sometimes called the "Warg System" having prevailed, that is nothing farther was known of a man's land than that he paid so much for it last year. The entry of his name to that amount of revenue constituting his "Warg" or account. Every thing was in the hands of the Shanbhogs. The Amildar was unable even to supply a list of the villages in the taluk, he only knew that there were so many Magnis or Shanbhogs' charges and the Shanbhog alone could tell the villages comprising his charge. From years past each Shanbhog has been in the habit of raising a certain amount of revenue whether it should rightly increase or decrease, he alone could tell if he chose to try and do so, so long as a ryot paid the same as in the preceding year and there was no special motive for coming down heavily upon him, no questions would be asked.

5. At para 32 of the Superintendent's letter is a statement of the annual so called demand collections and remissions for the past twenty-five years. It is evident from the constancy of the sums under the head of "Remissions" that as a rule an amount which in times past got under this head had little chance of coming out of it into "Collections," though there are one or two years, notably 1868—69 and 1872—73, in which the amount of remission appears to have been materially cut down, and one year, 1869—70, in which the operation of the Chief Commissioner's order allowing remissions for uncultivated portions of wargs produced a considerable increase under this head. In the absence of any definite knowledge of the areas of lands in wargs, the Chief Commissioner's order referred to was in fact practically impossible to work and gradually appears to have fallen into disuse. The extreme unchangeableness of the realized revenue is shewn by the fact that the average realizations for five, ten, twenty and twenty-five years back are all comprised between Rs. 1,02,000 and 1,05,000.

6. The grouping of the taluk for different rates of assessment and the maximum rates applied to each group are fully explained in the 44th to the 50th paras; the amount of revenue which we had a fair right to expect and the rates of assessment which could be fairly applied to produce that amount of revenue, have been most fully discussed and decided upon by the Superintendent and myself; the proposals therefore set forth in his letter have my full concurrence.

7. In a taluk under revenue management such as this has been, that it unavoidably very much at the mercy of the inferior native officials, it might be taken for granted that no excessive amount of revenue would be raised, as it would be in no way to the benefit of the aforesaid officials to raise the revenue, while they might find many advantages in collecting at a low rate. It was evident too that the revenue had for the last twenty-five years remained almost stationary, notwithstanding that the value of money in comparison with produce has decreased in that time nearly, if not quite, cent per cent. In the plain taluks of Mysore we find as a general rule that the revenue has increased at least 20 to 30 per cent in the last twenty-five years. This taluk and those like it have the special and most valuable advantage of producing the very best kind of supari, an article in general demand, of limited production, and of great portability and price in proportion to bulk, in such general demand in fact that there is no need to take it to market. The dealers come to the villages and purchase. In conjunction also with supari they grow other articles such as pepper and cardamoms of a no less valuable and portable description, though as regards price the latter is subject to great fluctuations.

8. The rates of assessment proposed for this taluk as detailed in para 44 of the Superintendent's letter are based on those already introduced into adjacent taluks and are approved of as fair by the local officers, the Commissioner and Deputy Commissioner.

9. The estimated result of the imposition of these rates is shewn in the 58th and 59th paras of the Superintendent's letter, of which the following is an abstract:—

| | | | |
|---|---|---|---|
| Collection for 1876—77 | | Rs. | 1,12,973 |
| Survey assessment on occupied lands on proposed rates | | | 1,45,268 |
| | Increase | | 32,295 |
| But from the above increase we have to deduct the estimated remuneration of village officers | Rs. 7,400 | | |
| The value of inams confirmed | 5,647 | | |
| District Irrigation Fund | 2,235 | | |
| | | | 15,282 |
| Which leaves a net increase of State revenue of | | Rs. | 17,013 |

10. There is moreover a considerable area of Government unoccupied assessed waste land, namely, acres 331 of garden land bearing survey assessment Rs. 2,972, and acres 1,235 of rice land bearing survey assessment Rs. 2,662, a total assessment of Rs. 5,635 on unoccupied waste land some portion of which we may hope to see come into occupation at no distant date to the farther improvement of the Government revenue. The unoccupied assessed dry crop land is of trifling area and assessment.

11. As regards local fund the following is the estimated result of the settlements :—

| | | | |
|---|---|---|---|
| Half-anna cess realization in 1876—77 | | Rs. | 3,766 |
| One anna local cess | | „ | 9,079 |
| | Increase | „ | 5,313 |

12. For the employment of this increase in the local funds there is an ample field in this taluk in making branch lines of road communicating with existing lines which will most amply repay the people for their contribution to this fund.

13. The amount deducted from the gross realizations for the payment of village officers, Rs. 7,400 is of course an additional collection from the people and so far is an addition to their burdens, but on the other hand they are relieved from liability to pay "Aya" to Shanbhogs which is roughly estimated in the Superintendent's 63rd para to amount Rs. 8,000 annually. Such estimates however can only be most roughly approximate, as payment of these dues is everywhere very irregular and exacted much more rigidly from the poorer classes of ryots than from those of any influence.

14. Considering the whole circumstances of this taluk it appears to me that the increase of revenue estimated for may be most justly demanded; we might indeed have pitched rates a little higher, but in a very wild country like this it appeared to me desirable to be most moderate in our demand when systematizing the land revenue assessment.

15. Appended to the Superintendent't report is a separate letter on the subject of the kans of this taluk, the proposals for the management of which I generally concur in. I am aware that the people have endeavoured to set up a claim to proprietary right to the land in kans for which they pay "Kan Shist." I heard a good deal of this when travelling through this taluk three years ago, but such a claim has most certainly no tangible base whatever ; the entry of "Kan Shist" in a ryot's "Warg" or account with Government can cover no more than the right to collect the wild products of the kan. My impression is that the claim to some kind of proprietorship in the land took its origin to a great extent in the people finding that the coffee planters were willing to buy them out of their rights, the asserted extent of which they of course took care to pitch as high as possible. The prohibition of coffee cultivation in kans will have the effect I imagine of much lowering the value of such imaginary claims.

16. The terms proposed for the future management of kans in the 14th para of the Superintendent's letter are I think most fully liberal, but they should in no case be allowed to operate to reduce the amount of "Kan Shist" at present paid in any individual case.

17. As regards the proposal to allow no jungle to be cut within 50 yards of any garden cultivation or within 50 yards of any hill stream or any spring, I consider that this limit might be most advantageously increased to 100 yards, and that in case of garden cultivation such an extension of limit is necessary to the well being of this kind of cultivation which is the mainstay of the revenue of the taluk.

18. In para 74 of the Superintendent's letter on the revised settlement of this taluk allusion is made to some transfers of villages which may as he states be more advantageously carried out hereafter.

*Proceedings of the Chief Commissioner of Mysore in the Revenue Department, (Revenue),—dated 18th March 1880.*

I shall be obliged by these papers receiving as early consideration as may be convenient; from having miscarried in the post they did not reach me for some twenty days after the date the last letter bears.

From the Offg. Superintendent, Mysore Revenue Survey, To the Survey and Settlement Commissioner of Mysore, No. 26, dated Banavar, 10th January 1879.

I have the honor to submit the following report on the revision of the assessment of the Koppa Taluk of the Kadur District of the Nagar Division.

Boundaries.

2. The taluk under report is situated on the edge of the Western ghats, and is bounded on the north by the Kavaledurga, on the east by the Lakvalli and on the south by the Múdgere Taluks. On the western side it marches with the South Canara Collectorate of the Madras Presidency.

Sub-divisions.

3. In this taluk there are in all 442 Villages, which are sub-divided into Magnis as shewn in the following statement:—

| No. | Magni. | No. of Government Villages. | No. of Inam Villages. | Total. |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 1 | Koppa ... .. ... | 64 | ... | 64 |
| 2 | Kodnad ... .. .. | 54 | ... | 54 |
| 3 | Baleri ... ... .. | 43 | ... | 43 |
| 4 | Hoskere ... ... ... | 33 | ... | 33 |
| 5 | Hegar ... ... ... | 20 | ... | 20 |
| 6 | Bagunji ... ... ... | 95 | ... | 95 |
| 7 | Horpatna ... ... ... | 18 | ... | 18 |
| 8 | Narvalli ... ... ... | 32 | ... | 32 |
| 9 | Megund ... ... ... | 19 | ... | 19 |
| 10 | Kig ... ... ... | 20 | ... | 20 |
| 11 | Nemar ... .. ... | 15 | ... | 15 |
| 12 | Kerre ... ... ... | 22 | ... | 22 |
| 13 | Hariharpur ... ... ... | 3 | ... | 3 |
| 14 | Bhandgadi ... ... ... | 2 | ... | 2 |
| 15 | Sringeri ... ... ... | ... | 2 | 2 |
| | Total... ... | 440 | 2 | 442 |

Natural characteristics.

4. It is roughly square in shape with an average length and breadth of about 20 miles; the Sringeri Jahagir occupies a space of about 8 miles by 6 in its very centre, its total area including the Jahagir is according to our survey about 243,304 acres, of which about 28,932 acres are Jahagir and inam land.

5. This taluk is one of the wildest and most picturesque in the whole of the Mysore Province, it is the basin of the Tunga, from where that river rises in the hill of Ganga Múla to where it flows into the Kavaledurga Taluk, a few miles north of Hariharpur; the north side of this basin being comparatively open, the remaining three sides are bounded by massive ranges of hills, *i. e.*, from Ganga Múla running north is the line of the Western ghats, of which the most remarkable hills are those of Shivangiri and Kig, from Ganga Múla west runs a very marked range up to the Kalasa or Múrti Parvat, one of the highest hills in Mysore (5,451 feet), thence the hills trending northward from the boundary of this taluk up to where it joins that of Lakvalli.

6. The western and southern ranges of hills are nearly always bare of trees as regards their summits, and a "Shola" country prevails, as you proceed east the elevation of the tree zone rises until on the eastern frontier of the taluk, the highest hill tops only are devoid of forest.

7. The interior of the basin above described is one succession of hill and valley, the former often of considerable height; the whole of the lower level, except in the south-west corner is, where not cultivated, covered with jungle or heavy scrub.

8. The Tunga river runs through the centre of the taluk, the water-shed being in no part very distant from the river, the hill streams, though very numerous, have not time to become of any size; the Sita and Begar hallas are the largest.

9. Harihárpur, the head-quarters of the Amildar, is situated on the left bank of the Tunga river; though geographically not central, it is perhaps as good a site for the head-quarters as could be selected, considering that the Sringeri Jahagir occupies the whole of the true centre of the taluk.

Rain-fall.

10. Owing to careful registers of rain-fall having been kept for some years past on some of the coffee estates situated far apart, we have a more trustworthy return of it here than we have obtained for taluks previously settled; the detail is shewn in appendix D. and gives an average of 172 inches for the western, and 108 inches for the eastern portions of the taluk.

Climate.

11. The climate is cool and healthy; last year fever was very prevalent here as it was throughout the Malnad, but it was considered a very exceptional season; until the past two years cholera has seldom found its way to this part of the country, but small-pox often of a virulent type is more common.

Soils.

12. The soil is a good red loam whose fertility is yearly renewed by the decomposed vegetable matter which is washed down by the rain from the surrounding forests.

Dry Crops.

13. Of dry crops little or none are grown; a little ragi is produced for home consumption in the high lying "Makki" lands, this is not reaped, but the heads only are picked, and the cattle turned in to eat the straw. A little castor and other oil seeds are grown as a second crop on some of the rice lands.

Wet Crops.

14. The staple wet crop is rice of the usual varieties, a second crop of rice is grown in some villages towards the west, and could be grown in many others were it the custom to do so, sugar-cane is of inferior description and grown in small patches for home use only, the jaggory produced is of too watery a nature to crystallize and is commonly used mixed with water as a drink.

Garden Crops.

15. The staple garden crop is the supari for which the taluk is renowned and the quality of the nut grown in the vicinity of Kalasa is said to be the best produced in Mysore; the best gardens are situated in the south-eastern half of the taluk, besides supari they yield the usual subsidiary crops of plantains, black pepper, betel leaf, &c. Cardamoms are a very valuable item, and are largely grown in those gardens where the water supply is ample; they require great and continuous moisture to come to any perfection and thrive best in gardens where the water is perhaps more than desirable for the supari.

Coffee cultivation.

16. During the past few years the cultivation of coffee has made great strides in this part of the Province; ten years ago those of Koppa and Nemmar were I think the only coffee estates under European superintendence in this taluk; at the time of classification (during the hot weather of 1877) there were 14 estates comprising an area of about 3,500 acres, since then so much land has been taken up, that there must be now nearly double that area held by European coffee planters; these estates are or will be shortly brought into a high state of cultivation, whereas the native coffee lands with few exceptions can scarcely be said to be cultivated at all. In the year 1877 there were 112 native coffee gardens occupying an area of about 4,500 acres; the total area held on coffee pattas in the whole taluk was a little over 8,000 acres.

Irrigation.

17. In a country where the rainfall alone suffices for rice cultivation, the artificial irrigation resorted to is of the simplest kind; small reservoirs, they can scarcely be called tanks, are formed at the heads of some of the valleys by means of an earthen dam, or the hill streams are diverted and brought under command for the irrigation of the gardens; there are no anicuts across the streams, and wells for agricultural purposes are unknown.

Forests.

18. There is a very large area of forest, but most of it being kan or evergreen jungle, I doubt its producing much revenue, there is very little wild pepper, but in the western jungles cardamoms are found in some places.

19. Many of these forests are held by the garden owners on payment of "Kanshist," there is some doubt as to the exact rights that are included under this tenure; this subject requires too lengthy a notice to be included in this report, I will therefore make it the subject of separate communication which I will forward as soon as possible so that the orders of the Chief Commissioner may be obtained previous to the introduction of the Survey settlement.

2. The remarks that have been made on the subjects of labor and wages in the settlement reports of the similarly situated Taluks of Nagar and Kavaledurga refer also to this taluk. I will merely briefly state that the resident laboring population not being sufficient, great numbers of people from both the plains and from below the ghats come here for the seasons during which their services are required. The coffee gardens having few resident laborers depend almost entirely on this foreign supply, the ordinary rate of labor is equivalent to 4 annas a day for a male, from 2 to 3 annas for a female; part of this is generally paid in grain and part in cash.

Labor and wages.

21. Six years ago there was not a road in the taluk except the line from Koppa to the Agumbi Ghat, and except along this highway not a cart was able to move. Now the country with the exception of the south and west is covered with a net work of roads either made or in course of construction, and carts are coming into common use,—these made roads being of such late constructions, the supplementary roads from the villages to the road are as yet in few cases made, but these will come in due course.

Roads.

22. Sringeri which is the natural centre of the taluk both in position and as being the head-quarters of the high priest of the Smarta Brahmans, has been selected as the place for all the roads to meet, and should eventually become a place of considerable mercantile importance.

23. At the present moment the roads most used are the old roads to Agumbi and the line from Hariharpur through Baguuji Pettah to Chikmagalur.

24. Cattle are numerous but of a poor description, they are still used to a great extent for the conveyance of produce from the villages to the made roads. Great droves of cattle belonging to Brinjaris and Korchars are often met with generally going to and from Mangalore and the coast, or to and from Chikmagalur.

25. There is no mart of any importance in this part of the country, a small weekly market is held at Koppa and there are also a few shops at Hariharpur and Baguuji Pettah. All the real trade is carried on by merchants who buy direct from the land holders at their own farm houses.

Markets.

26. The "Warg" tenure which obtains throughout the Nagar malnad prevails here. The system and terms of subletting are similar to those previously described in settlement reports of the taluks north of that now under consideration.

Tenure.

27. As far as I am aware there are no manufactures.

Manufactures.

28. The exports consist of supari to Bellary, Birur, and Gubbi; cardamoms to Haveri in the Dharwar Districts, and rice to the coast and sometimes to the plains.

Exports.

29. The imports consist of salt, salt-fish, Birmingham and Manchester goods from the coast, and dry grains, tobacco, cattle and cumblies from the plain country.

Imports.

The return of exports furnished by the Amildar shews for the last 10 years an average of—

| | | |
|---|---|---|
| Supari | 87,500 | Maunds. |
| Cardamoms | 700 | ,, |
| Black Pepper | 700 | ,, |

No return of the imports is obtainable.

30. Abstract of the statistical information collected by our classers is given in the following statement:—

Statistics.

| Villages. | Houses. | Population. | Square Miles. | Cattle. | Carts. | Ploughs. | Market Towns. | Remarks. |
|---|---|---|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |
| 442 | 4,566 | 21,206 | 335 | 25,515 | 21 | 4,037 | ... | |

The population gives an average of 63 to the square mile or an average of 471 to the square mile on culturable area only. The number of carts is very small owing to all the export and import trade being carried on by merchants who bring their carts with them from the plains.

13. From this it appears, and our figures in comparison with the Census returns of 1871 seem correct, that this taluk has a larger population per culturable area than we have found to exist in any taluks of Mysore previously settled; compared with the plain taluks this is owing to the absence of dry crops, to there being scarcely any waste culturable land, and to the whole of the cultivation being that of the more productive rice and garden lands; the northern malnad taluks already settled were found to have population of about 400 or 425 to the culturable square mile.

Past collections.

32. In the following statements are given details as to the collections during the past 25 years and the prices that have obtained during the past 8 years, information for that period only being available :—

| Years. | Total Demand. | Remissions. | Total Collections. | Remarks. |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 1852—53 | 1,15,671 | 15,007 | 1,00,664 | |
| 1853—54 | 1,16,598 | 14,702 | 1,01,896 | |
| 1854—55 | 1,14,541 | 13,626 | 1,00,915 | |
| 1855—56 | 1,16,690 | 15,735 | 1,00,955 | |
| 1856—57 | 1,15,796 | 14,932 | 1,00,864 | |
| 1857—58 | 1,16,104 | 14,524 | 1,01,580 | |
| 1858—59 | 1,16,442 | 14,703 | 1,01,739 | |
| 1859—60 | 1,16,876 | 14,476 | 1,02,400 | |
| 1860—61 | 1,17,834 | 15,125 | 1,02,709 | |
| 1861—62 | 1,16,989 | 14,544 | 1,02,445 | |
| 1862—63 | 1,16,375 | 13,700 | 1,02,675 | |
| 1863—64 | 1,17,335 | 13,852 | 1,03,483 | |
| 1864—65 | 1,17,257 | 13,219 | 1,04,038 | |
| 1865—66 | 1,17,775 | 13,029 | 1,04,746 | |
| 1866—67 | 1,17,187 | 12,346 | 1,04,841 | |
| 1867—68 | 1,17,608 | 12,362 | 1,05,246 | |
| 1868—69 | 1,16,674 | 11,929 | 1,04,745 | |
| 1869—70 | 1,16,754 | 16,931 | 99,823 | |
| 1870—71 | 1,13,905 | 13,938 | 99,967 | |
| 1871—72 | 1,15,230 | 13,543 | 1,01,687 | |
| 1872—73 | 1,15,004 | 11,808 | 1,03,196 | |
| 1873—74 | 1,13,452 | 15,227 | 98,225 | |
| 1874—75 | 1,13,698 | 12,085 | 1,01,613 | |
| 1875—76 | 1,22,204 | 13,529 | 1,08,675 | |
| 1876—77 | 1,25,097 | 12,124 | 1,12,973 | |
| Five years' average ... ... ... | | | 1,04,936 | |
| Ten years' average ... ... ... | | | 1,03,614 | |
| Twenty years' average ... ... ... | | | 1,03,440 | |
| Twenty-five years' average ... ... | | | 1,02,884 | |

| Year. | Rs. per Khandi of 160 Seers. | | | | | | Rs. per Maund of 44 Seers. | | | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Paddy. | | | Rice. | | | Jaggory. | | | Supari. | | | Pepper. | | | Cardamom. | | | | |

Past revenue management.

Vide paras 31, 32, 33, 34 and 35 of report quoted.

33. Many of the remarks which I made in my report on the adjoining Taluk of Kavaledurga submitted to you under this Office No. 959 of 18th December 1877, apply also to the taluk now under consideration especially as regards past revenue management, the confusion of villages and their lands, the system of keeping accounts by "Kos" or valleys and the existence of mams in wargs. I will therefore enter on these subjects more briefly than I would have done had that report not already been submitted.

34. We have in our measurement divided the Government portion of the taluk into 440 villages and in so doing adhered as far as possible to the Dejhara of villages furnished to us by the former Amildar, but that official at the same time expressed his inability to furnish any correct list, and now his successor informs me that it is equally impossible to furnish any statement of the yearly collections from any individual village in the whole taluk, in fact the division of this taluk into villages for revenue purposes appears never, or at all events not of late years, to have existed.

35. Geographically villages existed, *i. e.*, portions of land having more or less recognized boundaries, but the revenue accounts were kept by "Kos" or valleys in which the cultivation was situated. As a village often possesses land in two or more valleys and a valley often contains lands belonging, to half a dozen villages, there is no possible means of connecting the accounts of "Kos" with the lands of villages, and the smallest common denomination to which we can reduce these for the sake of comparing old and new results is the "Magni" or old Shekdar's charge. I have therefore been obliged, instead of the comparative statement of village collections usually furnished by us, to substitute comparative statement of magnis as shewn in Appendix A of this report.

36. The taluk consisting of 15 magnis, divided into 440 villages and giving an average revenue of Rs. 1,05,000 is at present divided into 21 Shanbhog's charges. These charges averaging 20 villages and Rs. 5,000 each are too large for an efficient performance of the responsible duties of the office, and during the course of the introduction of the survey settlement a distribution into suitably sized charges will as usual be made ; at the same time I propose to submit proposals for the rectification of the boundaries of villages and by these measures help to put a stop to the unsatisfactory state of revenue accounts referred to in the last few paras.

Inam lands.

37. Inams identical in nature to those of Kavaledurga and described in paras 34 and 38 of my report on that taluk, exist here also, but to a very modified extent their total value is less than Rs. 6,000.

Remarks on remissions

38. On examining the collection statement shewn in para 32 above, it will be seen that the collections up to the year 1868-69 varied little year by year and averaged about Rs. 1,03,000. After this year I find some difficulty in accounting for the vicissitudes shewn. No remissions were apparently ever given on account of failure of crops, and the whole amount of remissions are entered under the head of "Sharabaki" &c., *i. e.* permanent remissions.

39. In accordance with Chief Commissioner's Orders No. 5503—153 of 23rd January 1868—69, remissions on the waste lands contained in wargs were first granted for the year 1869—70 ; they continued to be given up to 1874—75 when they were stopped altogether.

40. How the amount of these remissions was fixed, and on what data they were made to vary from year to year during the interval they were in force, I cannot ascertain, but taking the old "Sharabaki" at Rs. 12,000, about Rs. 5,000 remission was granted for 1869—70 ; Rs. 2,000 for 1870—71, little or nothing for the two next years, and Rs. 3,000 for 1873—74.

41. The Commissioner, Nagar Division, refers to this subject in paras 114 and 115 of his Annual Report for 1874—75, and to the difficulty, in the absence of sufficient data, of granting relief to the wargdars justly ; presumably from this cause these remissions ceased from that year.

Remarks on past collections.

42. In 1875—76 the demand suddenly rose from about Rs. 1,14,000 to Rs. 1,22,000, and to Rs. 1,25,000, the highest on record, during the succeeding year, with a corresponding increase in the collections ; in a country where the warg tenure prevails such a sudden increase is unusual. An increased demand for grain, such as prevailed during the last two years under review, actually produced an increase in the area under cultivation, but in a warg country such increase does not usually produce any marked effect on the revenue, but merely the cultivation of the waste portion of the wargs already occupied. It will be noticed that the increase being in the demand as well as in the collections cannot be accounted for by cessation of the temporary remissions referred to in the last para.

43. The Amildar credits the greater portion of the increase of the last two years to the falling in of the leases on favorable terms granted on newly formed gardens (Alwi) and the remainder to waste lands being taken up for cultivation consequent on the high prices caused by famine in the plains ; but I am disposed to think that a considerable portion of this increase is due to the opening up of the country by both the new roads and by the measuring and preliminary survey operations, and that cultivated lands which were previously unrecorded have been lately brought to account, 1st, because their existence could no longer remain unknown to the authorities and 2nd, in order that, on the introduction of the survey settlement, titles to land might be established about which there might be some difficulty if previous payments for the same were not on record.

Grouping of villages & maximum rates.

44. For the purpose of assessment I propose to divide the taluk into groups with maximum rates as here shewn.

| Group. | Number of villages. | Maximum Dry rates. | Maximum rice rates. |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| | | Rs. As. P. | Rs. As. P. |
| I | 148 | 0 12 0 | 5 8 0 |
| II | 203 | 0 8 0 | 5 0 0 |
| III | 43 | 0 8 0 | 4 8 0 |
| IV | 46 | 0 8 0 | 4 0 0 |

In the I group are the villages lying along the high road from Tarikere to Hariharpur and from Hariharpur to Chikmagalur, and which by means of these roads enjoy superior facilities of the conveyance of their produce to market.

45. In the IV group are those villages to the south and west where the country is wild in the extreme, where there are no roads, and means of communication are, and from the nature of the country must remain, as bad as they are anywhere in the whole Mysore Province.

46. The villages intermediate between the 1st and 4th groups are put into the 2nd and 3rd groups in accordance with their respective advantages as regards roads.

47. The rain-fall and climate being everywhere suitable for rice cultivation, I have not taken these points into consideration with regard to the above grouping.

*Proceedings of the Chief Commissioner of Mysore in the Revenue Department, (Revenue),—dated 18th March* 1880.

Maximum rates on garden lands.

48. For the purpose of regulating the assessment on the garden lands I have been obliged to adopt grouping different to that which I have applied to the rice lands, and have been guided more by the climate, position with regard to ranges of hills, reputation and consequent market value of the supari nut of particular districts, and, garden produce being less bulky than rice, to a comparatively small extent only by the proximity of made-roads ; for the assessment of gardens therefore I have formed the different magnis into groups as follows :—

| Name of Magni. | Maximum Garden Rate. |
|---|---|
| Bagunji ... ... ... ... | Rs. 18. |
| Marvalli ... ... ... ... | |
| Hospatna ... ... ... ... | |
| Megund ... ... ... ... | |
| Koppa ... ... ... ... | |
| Kodnad ... ... ... ... | |
| Belari ... ... ... ... | |
| Hoskere ... ... ... ... | |
| Begar ... ... ... ... | |
| Kig ... ... ... ... | |
| Hariharpur ... ... ... ... | |
| Bhandagadi ... ... ... ... | Rs. 16. |
| Nemmar ... ... ... ... | Rs. 14. |
| Kerre ... ... ... ... | |

49. Under these maximums the assessment on each garden has been fixed as usual on its individual merits.

50. The above rates on rice and garden fit in with those previously sanctioned for the Shimoga District which touch the taluk under report to the north.

51. The effect of adopting these proposals will be I estimate as follows :—

Result of proposed rates on occupied lands.

| Group. | No. of Villages. | Garden. | | | Rice. | | | Dry crop. | | | Total. | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | Acres. | Assessment. | Average rate. | Acres. | Assessment. | Average rate. | Acres. | Assessment. | Average rate. | Acres. | Assessment. |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 |
| I | 149 | 1,573 | 24,765 | 15 11 11 | 5,441 | 14,921 | 2 11 11 | 138 | 42 | 0 4 10 | 7,152 | 39,728 |
| II | 201 | 2,912 | 46,538 | 15 15 8 | 11,205 | 29,956 | 2 10 9 | 145 | 37 | 0 4 1 | 14,260 | 76,531 |
| III | 44 | 633 | 9,748 | 15 6 5 | 2,314 | 5,776 | 2 7 11 | 18 | 4 | 0 3 7 | 2,965 | 15,528 |
| IV | 46 | 592 | 8,964 | 15 2 3 | 1,321 | 4,516 | 2 7 8 | 5 | 1 | 0 3 2 | 2,418 | 13,481 |
| 4 | 440 | 5,710 | 90,015 | 15 12 3 | 20,779 | 55,139 | 2 10 6 | 306 | 84 | 0 4 5 | 26,795 | 1,45,268 |

NOTE.—Columns 3, 4, and 5 are filled in here and subsequent forms in accordance with the groups referred to in para 44, and not on those of para 48.

52. The waste culturable land and its assessment are shewn in the following statement :—

Result of proposed rates on waste lands.

| Group. | No. of Villages. | Garden. | | | Rice. | | | Dry crop. | | | Total. | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | Acres. | Assessment. | Average rate. | Acres. | Assessment. | Average rate. | Acres. | Assessment. | Average rate. | Acres. | Assessment. |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 |
| I | 148 | 78 | 634 | 8 2 1 | 261 | 560 | 2 2 4 | 45 | 14 | 0 5 0 | 384 | 1,208 |
| II | 203 | 137 | 1,222 | 8 14 8 | 741 | 1,620 | 2 2 11 | 130 | 22 | 0 2 8 | 1,008 | 2,864 |
| III | 43 | 78 | 752 | 9 10 3 | 136 | 283 | 2 1 4 | 11 | 2 | 0 2 11 | 225 | 1,037 |
| IV | 46 | 33 | 365 | 9 9 3 | 97 | 199 | 2 0 10 | ... | ... | ... | 135 | 564 |
| 4 | 440 | 331 | 2,973 | 8 15 9 | 1,235 | 2,662 | 2 2 6 | 186 | 38 | 0 3 3 | 1,752 | 5,673 |

53. The Inam Superintendent has confirmed inam to the value of Rs. 5,134 (*Vide* appendix B.) which will be disposed of under the provision of Chief Commissioner's No. 3650—196 of 8th January 1878 as soon as possible after the introduction of the survey settlement. I have therefore considered it useless to shew separately the wargs on which these inams exist, but have shewn the whole area as Government and merely provide for the value of the land which will eventually become inam.

Minor inam lands.

There appears to be no service inam land in the taluk.

54. The next statement sums up in one form the total result of the survey valuation, &c., of the whole taluk.

Total result of the whole taluk.

| Group. | No. of Villages. | According to Survey. | | | | | |
|---|---|---|---|---|---|---|---|
| | | Government occupied. | | Government waste. | | Total waste & occupied. | |
| | | Acres. | Assessment. | Acres. | Assessment. | Acres. | Assessment. |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| I | 148 | 7,152 | 39,728 | 384 | 1,208 | 7,536 | 40,936 |
| II | 203 | 14,260 | 76,531 | 1,008 | 2,864 | 15,268 | 79,395 |
| III | 43 | 2,965 | 15,528 | 225 | 1,037 | 3,190 | 16,565 |
| IV | 46 | 2,418 | 13,481 | 135 | 564 | 2,553 | 14,045 |
| 4 | 440 | 26,795 | 1,45,268 | 1,752 | 5,673 | 28,547 | 1,50,941 |
| Area of unarable lands, roads, village sites, &c. ... ... ... | | | | | | 185,825 | |
| Area of two Inam Villages ... ... ... ... ... | | | | | | 28,932 | |
| Total area of the whole taluk, *i. e.*, 330 square miles ... ... ... | | | | | | 243,304 | |

55. The realizations on account of grazing and minor items for 1876—77 amounted to Rs. 290 only, and as I would recommend the same liberality being exercised in granting free grazing in this taluk as has already been sanctioned in other Malnad taluks, I will omit this item altogether from present consideration.

Grazing.

56. The collections for 1876—77 on account of kan shist amounted to Rs. 271 as per margin. The kans will be dealt with in accordance with the orders the Chief Commissioner may be pleased to pass on the subject hereafter. *Vide* para 19 of this report.

Kan shist.

| | | |
|---|---|---|
| Total Demand | ... | Rs. 291 |
| *Deduct—* | | |
| Jari | ... | ... Rs. 2 |
| Waste | ... | ... „ 18 |
| | | 20 |
| Total Collection | | Rs. 271 |

57. The ½ anna local cess for 1876—77 produced Rs. 3,766; under the proposed settlement the amount realizable under the one anna rate will be Rs. 9,079.

Local Cess.

58. Having now shewn all the old realizations from different sources I will contrast the estimated result of the proposed settlement omitting the items of kan shist and grazing with the collections for 1876—77 :—

General estimate.

| | | Rs. |
|---|---|---|
| Collections for 1876—77 | .. | 1,12,973 |
| Half anna local cess .. | .. | 3,766 |
| Total under old system.. | | 1,16,739 |
| Survey assessment on occupied lands | | 1,45,268 |
| One anna local cess .. | .. | 9,079 |
| Total under survey system.... | | 1,54,347 |

59. Excluding all calculations of separately levied cesses there is thus a gross increase of Rs. 32,295; but to shew the net result as far as Government is concerned, we must deduct the following items :—

| | | | Rs. |
|---|---|---|---|
| Gross increase as shewn above | .. | .. | 32,295 |
| *Deduct—* | | | |
| Estimate pay of Village Officers | .. | 7,400 | |
| Amount to be credited to District Irrigation Fund about | .. .. | 2,235 | |
| Value of Inam confirmed—10 per cent on allocation | .. .. | 5,647 | |
| Total Deduct.... | | .. | 15,282 |
| Net increase to Government as compared with collection for 1876—77 | .. | .. | 17,013 |

60. In accordance with instructions contained in Chief Commissioner's order No. 5181—347 of 27th October 1874, the Deputy Commissioner, Kadur District, and I have agreed in consultation that a rate of 3 pies per rupee on the wet assessment will suffice for the wants of this taluk with regard to its probable requirements for irrigation works; this is the same rate as has been applied to the neighbouring Taluks of Nagar, Ságar and Kavaledurga and will produce about Rs. 2,235 as contribution towards the District Irrigation Fund on account of the Government lands.

District Irrigation Fund.

61. Under the scale laid down in Chief Commissioner's order No. 219 of 27th October 1874, I have estimated the pay of the Village Officers at nearly Rs. 10,200. There appears to be no service inam land in their possession, but the Patels are granted remissions to the amount of Rs. 2,369—14—0 yearly and the Shanbhogs get pay to the aggregate amount of Rs. 466—8—0, *i. e*, about Rs. 1—12—0 each per mensem, so that about Rs. 7,400 will remain to be made good out of the treasury under this head.

Pay of Village Officers.

62. The rates at which "Aya" or grain perquisites to Village officers have hitherto been paid are as follows :—

Grain payments to Village Officers.

Patels receive nothing.

Shanbhogs receive one khandi of paddy on every ten khandis (Bijvari) of rice cultivation and 10 seers of supari on every 1,000 supari trees.

63. On a rough calculation the total aya paid according to the above scale would equal 1,000 khandis of paddy and 600 maunds of supari of about the value of Rs. 8,000 or more, but the actual payments were irregular and cannot be estimated. Whatever the amount was, it will after the introduction of the survey settlement cease, and the ryots will be relieved of the burden ; this should be taken into consideration when comparing the pressure on the cultivators of the new rates as compared with the old.

Remarks on Garden assessment.

64. The increase on the gardens is large as compared with that on the rice lands, but with regard to this it must be remembered that in 1876—77 the Halat on supari was reduced from Rs. 1 – 4—0 and 0—12—0 to one uniform rate of Rs. 0—12—0 per maund. What amount of relief this reduction in the excise gave to the supari trade it is difficult to say with any accuracy, but it ought to equal nearly half the survey assessment, the whole of the profit on this reduction did not go to the garden owners, but they had a considerable share in it.

65. Opinions as to the gross yield of the supari gardens vary greatly. From the return of exports during the past 10 years given by the Amildar and which must have been taken by him from the "halat returns" we find that the average yearly export of supari is about 87,500 maunds ; the survey gives us 5,710 acres of garden of all sort, which, as garden cultivation is constantly extending, would not be less than the average during the same period ; from this we gather that the average export of each acre of garden is about 15 maunds of supari and in many gardens there is little or no supari grown. Besides this there is the home consumption, and the long line of ghats bordering on South Canara offers opportunities for smuggling which are not altogether neglected ; it is reasonable also to suppose that a certain amount of smuggling goes on in the supari exported to the east.

66. The natives will own to 5 maunds per 100 trees, and in the good gardens 700 bearing trees is below the mark ; this would give 35 maunds as the produce of a good garden, but a garden owner will sometimes state that, although his own garden only yields 5 maunds per 100 trees, the gardens at some little distance yield double that quantity; this may be an exaggeration, but taking everything into consideration I am induced to think that Captain Major's estimate (*vide* para 16 of his report attached) of from 30 to 50 maunds is the yield per acre in a fully planted garden is within the mark.

67. Besides the supari the better gardens produce cardamoms and pepper, and all yield plantains, vegetables, &c., for the support of the cultivators and add materially to their value.

68. From consideration of the remarks contained in the last few paras, we get the following figures of the produce and value of an acre of supari gardens and the amount of relief which was experienced from the reduction of the halat in 1871.

| | |
|---|---|
| As per Amildar's halat return for past 10 years, calculated on the whole occupied garden area of the taluk, whether supari garden or not, ignoring all smuggling and local consumption and irrespective of value of cardamoms, pepper, plantains, &c. | 15 maunds per acre at Rs. 5 per maund, Rs. 75. |
| As per native estimate of 5 maunds per 100 trees on an average garden of 700 bearing trees, ignoring minor produce. | 35 maunds at Rs. 5 per maund, Rs. 175. |
| As per Captain Major's estimate *vide* his report attached ignoring minor produce, average. | 40 maunds at Rs. 5 per maund, Rs. 200. |

69. According to these estimates and supposing $\frac{3}{8}$rds of the gross produce of each garden to be of the superior description of nut, a very low estimate, the reduction of the halat in 1871 referred to in para 64 above gave relief of Rs 5, Rs. 11 or Rs. 13—8, respectively, per acre to all supari gardens.

70. Government has during the past few years spent large sums in the construction of roads and thus opening out the country, and may justly look for a substantial return for this expenditure in the shape of increased revenue.

Comparison of proposed rates with those of other settled Malnad Taluks.

71. It will be noticed on reference to the following statement that the comparatively large increase in the revenue of the taluk is obtained by lower maximum rates than have been applied to any of the Malnad taluks previously settled, and as the crops both rice and garden compare favorably, and the other circumstances of climate, &c., are not very different from those of the Malnad generally, the increase must be considered as due solely to the low and unequal distribution of assessment which has obtained heretofore. Until the Public Works Department opened out this country a few years ago, $\frac{9}{10}$ths of the taluk was to all intents a land unknown to

[redacted] unvisited by any European officer and very seldom indeed by any of the higher grades of taluk officials, the whole control of the revenue was in the hands of the Shanbhogs, influential Gaudas and Sutigidars, and it is I think rather creditable to them that they paid the amount of revenue that they did :—

| Description of land. | Group. | Koppa.* | | Kavaledurga. | | Ságar. | | Anantapur. | | Nagar. | |

| | VI | ... | ... | ... | ... | 0 8 0 | 0 3 0 | ... | ... | ... | ... |

*The average garden rates are here calculated on the garden grouping mentioned in para 48.

List of Inam villages appended.

72. In accordance with instructions contained in para 32 of Chief Commissioner's order No. 12709—Rev. 360 of 14th March 1877, I beg to attach a statement C containing nominal list of all the inam villages contained in the taluk under report.

Proposals for transfer of villages.

73. It will be noticed from the map which accompanies this report that with the exception of the south-east corner the taluk is compact in shape and few alterations in its boundaries are advisable. The small outlying village of Jigalimani might advantageously be transferred to the Lakvalli Taluk, that of Magundi to the Múdgere Taluk, and the isolated group of villages belonging to the latter taluk, shewn as a blank in the map, transferred to Koppa; but these changes could best be made when the Taluks of Múdgere and Lakvalli come under settlement and not now.

Explanation of the difference in the number of villages.

74. The difference in the number of villages shewn by the Amildar in his confessedly only approximately correct list and those shewn by us is so great and inexplicable, that I trust I may be excused making any attempt to reconcile the two. Many of the Amildar's villages had no existence except on paper, others consisted of few acres of land in the heart of another village ; we have reduced this chaos to something like order ; but some more changes and amalgamations will probably be found necessary at the time of settlement, and if so a detail report of such will be made hereafter.

Captain Major's report appended.

75. A short report by Captain Major who superintended the classification of this taluk is attached and will be found to contain detailed information on some points noticed in this report.

76. In conclusion I beg that sanction may be obtained to the proposals contained in this report in time to permit the introduction of the settlement in the month of March next.

## APPENDIX A.

**Statement shewing the Area, Cultivation, Cattle, Carts, Ploughs, Houses, Population and past and proposed Survey Assessment of the 442 Villages of the Koppa Taluk of the Kadur District, reported on in Survey Superintendent's letter No. 26, dated 10th January 1879.**

| Number. | Name of Village. | By Survey Accounts. | | | | | | | | | | | Past collection on cultivated lands. | Survey Kamal or Standard Assessment. | | | | | | | | Cattle. | | | Carts. | | | Population. | No. of Houses. | Ploughs. | Remarks. |

## APPENDIX C.

Statement shewing the Inam villages in the Koppa Taluk of the Kadur District, reported on in Survey Superintendent's No. 26 of 10th January 1879.

| No. | Village. | Description of Inam. | How disposed of by the Survey. |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| 1 | Sirikardi ... ... | Sarvamanya ... ... | Valuation Survey. |
| 2 | Sringeri Shime ... | Do ... ... | Not measured at all. |

From the Offg. Superintendent, Mysore Revenue Survey, To the Survey and Settlement Commissioner of Mysore, No. 27, dated Banavar, 10th January 1879.

In para 56 of my report No. 26 of 10th instant to your address on the subject of the revision of assessment of the Koppa Taluk of the Nagar Division, I referred only briefly to the subject of kans and the tenure on which they were held in that taluk, as the subject appeared too lengthy to be therein included ; I have now the honor to enter on this question in detail with a view to the Chief Commissioner's orders being obtained as to how they should be dealt with in the approaching survey settlement.

2. Almost the whole of the Koppa Taluk with the exception of the parts assessed by us as cultivated or culturable, is covered more or less with jungle, principally evergreen, but in some cases deciduous, and in some grass and scrub ; the evergreen jungles differ from the "Kans" of Sorab and the other northern settled taluks in that they produce comparatively little pepper ; part

of this jungle is supposed to be "Sopina Byana" referred to in para 13 below, but as the boundaries between "Sopina Byana" and the other jungle are generally imaginary, it may, as far as this report is concerned, be considered part of the jungle.

3. Throughout the greater portion of the taluk certain wargdars have included in their present assessment an item called "Kan-shist" on account of which they claim the right to collect pepper, wax and other forest produce, to draw toddy from the "Byan" trees, to cut timber for household purposes, and especially the right to cut green boughs and collect leaves for manure for their garden and rice lands on the whole of the jungle lands within their village boundaries. They maintain that in the same way as they hold cultivated lands they have a proprietary right over their jungles as long as they continue to pay the Government assessment, but do not I believe in any way dispute the liability to the present assessment being revised. They may not cultivate the land or grow coffee therein without obtaining "Patta" for the same.

4. In the country to the west I believe "Kan-shist" is not paid.

5. The imposition of "Kan-shist" is of long standing and is stated to have been fixed originally by Shivappa Naik.

6. Until the last few years no one had any interest in these jungles except the wargdars, and their claims were never brought to notice, but since the cultivation of coffee has commenced in this taluk, a value has been given to these jungles which they never possessed before, and the claims of the wargdars have often clashed with the interests of coffee planters desirous of obtaining jungles for coffee cultivation. Any jungle applied for for coffee was immediately claimed as some one's "Kan-shist" land, difficulties were thrown in the way of the applicant and the claimant generally had to be bought out before the planter was put in possession of the land by Government. In an apparently isolated case brought to my notice the planter continues to pay the Kan-shist imposed on the jungle granted to him.

7. I looked at some of the "Pattas" of wargdars of the Koppa Taluk and found them to shew:—

| | | | | |
|---|---|---|---|---|
| Garden land so many dayas | .. | = Rs. | 0 | 0 0 |
| Rice land so many kandis | . | = Rs. | 0 | 0 0 |
| Kan-shist .. .. | .. | = Rs. | 0 | 0 0 |
| | | Total... Rs. | 0 | 0 0 |

8. The amount of Kan-shist was generally very small, often a few annas only, no area or definition of the extent or boundaries of the land to which it applied was ever given, and consequently the wargdars claim on account of it all the uncultivated land within the village boundaries.

9. The total Kan-shist in Koppa is shewn in the taluk records to be for the year 1876—77 as follows, and these items have varied imperceptibly during the past 20 years:—

| | | | | |
|---|---|---|---|---|
| Jari .. | | Rs. | 1 | 10 6 |
| Nasht .. | .. | „ | 0 | 0 0 |
| Waste .. | .. | „ | 18 | 2 7 |
| Collections .. | .. | „ | 217 | 14 9 |
| | Total... | | 290 | 11 10 |

10. The claims of the wargdars with reference to these jungles have been stretched to the utmost principally I think on the following grounds—

1*st.* That they might get as much benefit to themselves as possible by selling the right claimed by them to coffee planters.

2*nd.* Unwillingness to have their jungles destroyed, because it lessens their supply of leaf manure, dries up the springs which feed these gardens and generally reduces their water supply.

3*rd.* By claiming the land as their own to keep the planters away, as the Malnad people prefer living a quiet retired life.

11. When land is taken up for coffee cultivation, the immediate result is the felling of the whole forest except a few trees left for shade; whether such destruction of forest does dry up the springs and reduce the water supply has often been disputed, but the mass of evidence is that it does so, and Government are now in various parts of India exerting themselves to re-clothe the hills with the forest of which they have been denuded by the reckless cutting of previous years.

12. Considering the nominal amount of the past payments, compared with the extent of the claims, and that no particular land is even mentioned as that for which the payment is made,

*Proceedings of the Chief Commissioner of Mysore in the Revenue Department, (Revenue),—dated 18th March 1880.*

I [redacted] hat the claim of the payers of kan-shist to a proprietary right to all the jungles in their villages cannot be considered good, and that there is no reason why Government, if it thinks fit to do so, should not remit the rent and resume the land as suggested by the Commissioner, Nagar Division, in para 64 of his Annual Report for the year 1875—76.

13. A certain quantity of jungle is absolutely necessary to the cultivators for the purpose of obtaining green boughs and leaves for manuring both their rice and garden lands, and such jungles locally called "Sopina Byan" or "Sopina Betta" are apportioned by us to each village, free of assessment, at the time of the introduction of the Survey settlement; but the indirect requirements of the ryots go beyond this, shelter from the wind is one of the first requisites for successful garden cultivation, and preservation of the springs and water supply is necessary not only for the cultivation in the immediate neighbourhood but on general grounds for the whole country.

14. The question therefore resolves itself into—

A. Under what terms and rates and to what extent should jungles (other than Sopina Byan) be continued to those who have previously paid "Kan-shist" and thus hold a presumptive right to the jungles?

B. What jungles shall be preserved in their primeval condition?

C. What jungles shall be available for coffee cultivation on application for the same?

15. With regard to A, I would propose that all jungles in the taluk, except Sopina Betta and those already held on coffee patta, be assessed at rates similar to those sanctioned for the Nagar Taluk (*vide* Chief Commissioner's Notification No. 86 of 2nd July 1878) *viz.*, about one anna per acre and offered at that rate to the present payers of kan-shist, their rights, should they accept the rate, to be similar to those sanctioned for the Nagar Taluk; should the land be required by Government for the purpose of giving the same out on coffee patta to any applicant or for any other reason, the tenant to be liable to be ousted summarily and 3 years assessment of the land so resumed to be paid him from the treasury in compensation for his loss of tenure.

16. All assessed kans which the kan-shist payer refuses to take up on revised assessment referred to in last para, to have the assessment struck off, and as well as all other unoccupied jungles to be sold by public auction yearly as regards their forest produce.

17. As regards B I would propose that no jungle be allowed to be cut within 50 yards of any garden cultivation or within 50 yards of the banks of any hill stream or within 50 yards of any spring.

The latter proposition I have taken from Notification by Government of India No. 588 F. of 8th June 1878, administration of forests in Mysore, published at page 170 of *Mysore Gazette* of 29th June 1878.

18. As to what other measures should be taken generally for the preservation of the forests I would suggest reference to the Conservator of Forests.

19. As regards C each case of application must I think be dealt with on its own merits—subject to the orders that may be passed on the questions A and B.

20. I beg to attach copy of letter No. 155 of 21st June 1878 from Commissioner, Nagar Division, on the above subject.

*P. S.*—Since writing the above report, Chief Commissioner's order No. 2209-11—323 of 18th October 1878 giving instructions that, in compliance with letter from the Government of India No. 968 of 25th September 1878, the cultivation of coffee in kans is prohibited, has been received from which it appears that the preservation of forest generally is considered to be of primary importance.

---

From the Commissioner, Nagar Division, To the Superintendent of Revenue Survey, Mysore, No. 155—55, dated Shimoga, 21st June 1878.

I have the honor to acknowledge the receipt of your docket No. 400, dated 7th instant, forwarding a printed copy of the classing officer's report on the Koppa Taluk.

2. With reference to the 15th para of this report I conclude that the question of kan-shist in its relations to jungles suitable for coffee cultivation will be finally determined at the time of settlement.

*Proceedings of the Chief Commissioner of Mysore in the Revenue Department, (Revenue),—dated 18th March 1880.*

3. At present Revenue Officers deal with each case according to its apparent requirements and this no doubt must always be done. But it has yet to be decided by experienced and scientific enquirers on the spot whether any further coffee operations on an extended scale can be carried on without detriment to the existing rice and supari cultivation, and if so under what conditions.

4. The warg lar's own idea of his requirements will be of little value if it is confined to a calculation of the extent of forest necessary to yield him leaf manure for his rice fields or even to preserve his springs (if indeed the retention of a patch of forest at its source does preserve a spring.)

5. The question will have to be decided on general and broader principles connected with climate and the retention of moisture in the soil, and in the air in and about the valuable supari gardens during the prolonged dry seasons which too frequently occur.

---

From the Acting Commissioner, Nagar Division, To the Superintendent of Revenue Survey, No. 716, dated Camp Chitaldroog, 21st February 1879.

I have the honor to acknowledge the receipt of your letter No. 29, dated 10th ultimo, forwarding for opinion a copy of the Survey report on the Koppa Taluk.

2. The Deputy Commissioner, to whom a copy of the report had been sent, has expressed his concurrence with the rates proposed.

3. The taluk is similar in almost all respects to Kavaledurga which has been lately settled; the only difference in my opinion being (1) that Tirthahalli, the head-quarters of the latter, commands a greater amount of trade than Hariharpur or Sringeri, and (2) that the road connecting Koppa with the Maidan taluks presents, during several months of the year, obstacles in the unbridged Tunga and Bhadra rivers.

4. These circumstances have, I believe, received consideration, though not specially mentioned in the report. The proposed maximum wet, dry and garden rates are lower than those adopted in almost all other Malnad taluks.

5. This, I observe, is also the case with the average rates of dry and wet lands. But those of garden lands, especially in the 2nd group, are higher than those imposed on the corresponding groups in Kavaledurga and Nagar. The cause of such difference has not been expressly explained, but it is presumed that it may be due to the soil being generally superior in quality to that of Kavaledurga and the superiority of the supari produced seems to bear this conclusion out.

6. For these reasons the rates proposed appear to me to be fair, and I would recommend their adoption.

7. The formation of villages, as proposed, is a difficult task, but is absolutely necessary to ensure the accounts being properly written up.

8. The question of dealing with kans has been already decided.

9. The original enclosure is herewith returned.

---

No. 6749-59—R. 1183, dated Bangalore, 18th March 1880

Order thereon.—The introduction of the survey rates into the Koppa Taluk having already been sanctioned, the papers above read are recorded.
